

FINANCIAL SERVICES SECTOR

“The depth of talent and breadth of influence which BCCK wield in the Korean market is unsurpassable. We discovered this first hand following our decision to engage BCCK on a project to understand how our investment products could be used by Korean pension funds. We were very impressed by BCCK’s abilities to quickly understand our solution and set up a project plan for the research. More importantly, with very little time at their disposal, they were able to obtain access to some of the largest organisations and set up meetings with key decision makers. We hope to continue working with them as we delve deeper and start implementation of our plans.”

– Head of European Institutional Solutions, SEI

The BCCK has:

- Secured senior-level meetings with potential Korean partners such as public pension funds, asset managers, sovereign wealth fund, and relevant government bodies to explore collaboration opportunities and deepen understanding of Korean regulations
- Conducted bespoke market research on topics such as Korea's corporate pension market and market entry strategies needed to work with public/private pension operators
- Undertaken benchmarking, competitor and opportunity analysis initiatives
- Set up BCCK co-branded workshops/seminars to help promote services/financial products offered by client companies
- Provided access to potential customers for financial services (e.g. high-income earners, heads of MNCs and Korean companies) through invite-only networking events
